## Data Specifications Sheet

### Butyl Rubber

A synthetic rubber with great mechanical and durability properties. Butyl rubber sheet, a synthetic elastomer (rubber) produced by copolymerizing isobutylene with isoprene.

#### Applications

Butyl Rubber can be used on work tables, flooring, playgrounds, belts and other butyl rubber applications that require a isobutylene rubber

#### Advantages

Butyl Rubber has excellent chemical and heat resistance with low permeability to air and good weathering properties. It has however poor resistance to petroleum based fluids. It has high resistance to permeation.

#### Physical Properties / Technical Data

The information represents typical values which can vary according to the application. These values do not constitute a performance guarantee. Users should determine, prior to use , the suitability of this material for their particular application.

Surface	Smooth
Temp Range	-4°C +80°C
Tensile Strength	1000 PSI
Durometer Shore A	55 ±5
Elongation	350 %
UV Rating	Good
Chemical Resistance	Good
